

IN THE DRAWINGS

Figure 5 has been added to show a light pipe 352 locked between the first planar element 310 and the second planar element 320 such that light from a signal lamp 350 located on the third planar element 330 is conducted through the port 311. Support for this additional Figure can be found, *inter alia*, in originally filed claim 13, which is part of the original specification as filed.

IN THE SPECIFICATION

Please add the following paragraph after paragraph [0018]:

[0018.1] Figure 5 is a cutaway side view of an integrated standard connector adapter card according to one embodiment of the present invention.

Please replace paragraph [0034] with the following paragraph:

[0034] For one embodiment, as illustrated in Figure 5, a light pipe 352 may be locked in place between the first planar element 310 and the second planar element 320 such that light from a signal lamp 350 (e.g., LED) located on the third planar element 330 (PCB) is conducted through the port 311.
